

instructions for use

- 1. Fabricant:** HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany
- 2. Product:** surface-mounted network socket with RJ45

The surface-mounted network socket with RJ45 keystone module is designed for surface installation and is used to connect RJ45 network cables in structured cabling systems. It enables reliable data transmission in local networks and is particularly suitable for installations where flush mounting is not possible or not desired.

Installation is carried out directly on the wall surface. The network cable is terminated in the RJ45 keystone module, after which the module is inserted into the surface-mount box and secured. This solution is ideal for visible cable runs in residential, office, or technical rooms and provides a neat, well-organized network connection at permanently used outlets.

As this is electrical equipment, we strongly recommend that installation be carried out exclusively by qualified personnel to ensure safety and to prevent possible damage.
